

Here is the list of papers from where the candidate would select and present during the interview:

- **Temporal Misalignment Attack and Defense:**
 - [ICLR'26] Detecting Temporal Misalignment Attacks in Multimodal Fusion for Autonomous Driving
 - [SaTML'26] Temporal Misalignment Attacks against Multimodal Perception in Autonomous Driving
- **Adversarial and Backdoor Defense:**
 - [AsiaCCS'26] Noise, Why Can't You Bend? Detecting Adversarial Perturbations in Wireless Sensing via Structural Fragility
 - [ESORICS'25] Let the Noise Speak: Harnessing Noise for a Unified Defense Against Adversarial and Backdoor Attacks
- **Deep Learning-based IDS:**
 - [TCPS'25] VehiGAN: Generative Adversarial Networks for Adversarially Robust V2X Misbehavior Detection Systems
- **Or any paper by any author (even you) ← [a less preferred option].**

The papers (pdf) are available at <https://shahriar0651.github.io/publications/>
